# INTERIM REPORT 1 JANUARI - 30 JUNI 2021

## Q2 2021

- ▶ The result for the quarter amounted to -5 228 kSEK (-4 709 kSEK)
- ▶ Cash flow for the quarter amounted to -3 096 kSEK (28 668 kSEK)
- ▶ Cash and cash equivalents at the end of the quarter amounted to 25 706 kSEK (39 726 kSEK)

Summary Financial Highlights kSEK	Apr-Jun 2021	Apr-Jun 2020	Jan-Jun 2021	Jan-Jun 2020	Jan-Dec 2020
Net revenue	0	0	0	0	0
Operating result	-5,212	-4,709	-9,598	-8,690	-17,235
Result	-5,228	-4,709	-9,643	-8,690	-17,289
Balance sheet total	33,647	49,259	33,647	49,259	39,640
Cash flow	-3,096	28,668	-7,914	37,662	31,556
Cash and cash equivalents	25,706	39,726	25,706	39,726	33,620
Equity ratio %	87%	91%	87%	91%	92%
<b>Data per share</b>					
Number of shares at the end of the period	9,806,200	7,389,385	9,806,200	7,389,385	9,606,200
Result per share before and after dilution*	-0.55	-0.64	-1.01	-1.19	-2.06
Cash flow per share	-0.32	3.88	-0.82	5.17	3.75
Equity per share	2.97	6.08	2.97	6.08	3.79

\* Dilution effects is not calculated when the result is negative

## Significant events during Q2

At the General Meeting it was decided to adopt two long-term incentive programs: one for the Board of Directors, consisting of warrants (LTI 2021/2024), and another one for the employees consisting of employee stock options (LTI 2021:1).

The warrant program LTI 2018/2021 has also closed, and all warrants were exercised. The warrant program was assigned to the Board of Directors and consisted of 200 000 warrants, with a vesting period during 26 April – 26 May 2021. To finance the share subscription, the warrant holders have sold 120 000 warrants to a long-term investor, who has also exercised the warrants. The exercise price was 11 SEK per share, hence 2.2 mSEK was added to Ziccum through the share subscriptions. The exercised warrants increased the number of shares and votes with 200 000 and the total amount of shares is hereby 9 806 200.

## Significant events during Q1

Ziccum published its goals for 2021 on January 12. The major goals are to enter into the first licensing agreement for one or more dry-formulated vaccines, and to present a detailed plan for establishing a modular Fill and Finish production facility for filling and final packaging of dry, thermostable powder vaccines, including the necessary partnerships and financing plans. Ziccum's medium-term goal (2–3 years) is to establish the first Fill and Finish facility for dry-formulated vaccines in Sweden.

On January 25 Ziccum announced the extension of the evaluation agreement with Janssen Vaccine & Prevention B.V. (one of the Janssen Pharmaceutical Companies of Johnson & Johnson) that was entered into on October 3, 2019. The purpose is to finalize the analysis of Ziccum's air-drying capabilities on one of Janssen's vaccine platform technologies.

On March 17 Ziccum announced that the company has been accepted as a member of NIIMBL, the US National Institute for Innovation in Manufacturing Biopharmaceuticals. NIIMBL drives innovation and uptake of new technologies within biopharmaceutical manufacturing in the US. NIIMBL is among others funded by the US National Institute of Standards and Technology (NIST) and the U.S. Department of Commerce and is able to distribute federal grants.

## Significant events after the reporting period

Nothing significant to report.

## CEO statement

Vaccination is and has always been one of the best ways to prevent pandemics and epidemics. The need has never been greater than it is today. Not least due to the Covid-19 pandemic, which has proven the enormous benefits vaccines have on society as a whole. Increasing global travel, population growth, climate change, urbanization and overcrowding are all potential risks for starting new epidemics and pandemics. And it is children who are exposed most; one out of five still don't have adequate vaccine coverage. About 1.5 million children die every year of vaccine-preventable diseases. Adults too have been hit hard by the Covid-19 pandemic, and many countries have realized the value of having their own vaccine production facilities.

Ziccum has a unique and patented technology – LaminarPace – that makes it possible to create vaccines in powder form. With today's conventional vaccine technologies, it is not possible, practically or economically, to generate powder vaccines. Yet the benefits are many. The stability and lifespan of the vaccine are improved, it facilitates the logistics from the manufacturer to the patient and makes it possible to distribute vaccines to new places where the cold chain is a huge challenge. Ultimately it means getting more vaccines to more people at a lower cost.

Ziccum's focus is on three main areas: development of thermostable formulations of vaccines, preparations for production on a commercial scale and establishing external collaborations with industrial partners that develop vaccines, and, importantly for the industry, Non-Governmental Organizations.

Driven by the ongoing pandemic, our work to develop thermostable vaccines has been more and more focused on Covid-19 vaccines. For instance, we are now working on air-drying vaccines built around mRNA technology. Positive results should broaden our offering to the vaccine industry significantly. In parallel with this we are continuing to develop a system for vaccine manufacturing according to plan, and we are optimistic about eventually being able to offer the vaccine industry a robust and efficient manufacturing solution. Our cooperation with Janssen is continuing according to plan.

Ziccum has two main goals for 2021: to make concrete plans to establish a demonstration facility for Fill and Finish based on the LaminarPace technology, and to continue the work around out-licensing the technology. A licensing deal should validate Laminar Pace and be tangible proof of the commercial value of Ziccum's offer.

We see many new initiatives from a range of regions around the globe to dramatically increase their manufacturing capacity for vaccines. This entails that our customer base, i.e. global vaccine companies, will need to extend with new parties, primarily in low-income countries. In these countries our solution for thermostable vaccines has strong advantages, since many Covid-19 vaccines currently have to be transported and stored at -80°C. To transport and store vaccines at -80°C with undeveloped infrastructure and unreliable electricity supply is a huge challenge.

In conclusion, Ziccum is well-positioned for an exciting future within an industry that will be firmly in the spotlight for a long time ahead.

Lund 25<sup>th</sup> of August 2021

Göran Conradson

CEO

## Expected future development

The company's goals for the year, as earlier communicated, are to:

- ▶ Enter into a first licensing agreement regarding one or more vaccine
- ▶ Present a detailed plan for establishing a modular Fill and Finish production facility for filling and final packaging of dry, thermostable powder vaccines, including the necessary partnerships and financing plans
- ▶ Expand international collaborations
- ▶ Continue to set a high pace in Research and Development activities, with the aim of generating new data that can form the basis for further patent applications
- ▶ Expand process development for the formulation process and adapt it for industrial production
- ▶ Apply for grants
- ▶ Continue to hire, to strengthen the opportunity to deliver on the company goals

## Licensing agreements

Based on the collaboration agreements and the ongoing positive dialogues with established parties on the market, it's Ziccum's goal, during 2021, to generate at least one license agreement based on commercial terms.

## Manufacturing facility

During 2020 Ziccum have accomplished a conceptual design of a manufacturing facility together with KeyPlants AB based on their modular system. This study pointed out many advantages compared to traditional lyophilization (freeze-drying):

80% less electricity

65% less Operational costs (OPEX)

50% less Investment cost (CAPEX)

The conceptual design has been well received by the industry and different stakeholders within the vaccine field. By establishing a Fill and Finish facility it will be possible to concretize what Ziccum can offer. The company's business model and revenue streams can expand by taking a larger part of the value chain.

## International cooperation

A key to success is to make sure that stakeholders within the vaccine market know and understand that Ziccum's technology can develop new vaccine formulations that are less dependent on the cold chain. In that way, those stakeholders can demand and influence established vaccine producers to make a change towards thermostable vaccines. The goal is to enter into at least one formal cooperation during 2021.

## Patent

It is the company's ambition to continue setting a high pace on its own Research and Development activities with the aim of generating new data that can form the basis for new patent applications, primarily regarding more types of vaccines. Furthermore, the cooperation with AMU, Aix-Marseille University, which provides both a good supply and knowledge about viruses and vaccines, will continue.

## Process development

Ziccum puts a lot of effort into developing the process of producing thermostable vaccines and adapting the technology for industrial production. This work is done with the aim of furthering effective, ongoing and upcoming discussions with industrial partners. The project includes upscaling of production capacity, automatization, and adaption to regulatory standards.

## Grant applications

The vaccine market offers several different opportunities to receive various forms of grants. Ziccum will apply for such grants that the company deems to be in Ziccum's interest and opportunity to receive.

## Organizational development

We will continue to have a great need to employ competent and experienced staff to further strengthen the company's ability to deliver on its set goals.

## Result - Q2

Operating income from goods and services amounted to 0 kSEK (0).

Operating expenses amounted to 5 216 kSEK (4 711), of which personnel costs amounted to 2 502 kSEK (748).

Other external costs amounted to 2 526 kSEK (3 869).

Operating result amounted to -5,212 kSEK (-4 709) and result after financial items amounted to -5 228 kSEK (-4 709).

Result amounted to -5 228 kSEK (-4 709).

Earnings per share before and after dilution amounted to -0.55 SEK (-0.64).

Cash flow during the period amounted to -3 096 kSEK (28 668). The cash flow included a share issue of 2 200 kSEK (32 319) and a raising of loans of 0 kSEK (2 000). Cash flow per share amounted to -0.32 SEK (3.88). Cash flow excluding share issues and raising of loans amounted to -0.55 SEK (-0.57).

## Result and financial position - reporting period (Jan-June)

Operating income relating to goods and services amounted to 0 kSEK (0).

Operating expenses amounted to 9 603 kSEK (8 692), of which personnel costs amounted to 4 631 kSEK (1 292).

Other external costs amounted to 4 654 kSEK (7 224).

Operating result amounted to -9 598 kSEK (-8 690) and result after financial items amounted to -9 643 kSEK (-8 690).

Result amounted to -9 643 kSEK (-8 690).

Earnings per share before and after dilution amounted to -1.01 SEK (-1.19).

Cash flow during the period amounted to -7 914 kSEK (37 662). Cash flow included share issues of 2 200 kSEK (46 213) and raising of loans of 0 kSEK (2 000). Cash flow per share amounted to -0.82 SEK (5.17). Cash flow per share excluding new issues and raising of loans amounted to -1.10 SEK (-1.23).

Cash and cash equivalents as of June 30 2021 amounted to 25 706 kSEK, compared with 33 620 kSEK on December 31 2020.

The company's equity as of June 30 2021 amounted to 29 139 kSEK, compared with 36 381 kSEK on December 31 2020.

Equity per share amounted to 2.97 SEK, compared with 3.79 SEK on December 31 2020.

The company's equity ratio as of June 30 2021 was 87% compared to 92% on December 31 2020.

The result follows budget expectations regarding the costs of the ongoing commercialization of LaminarPace technology. Personnel costs have increased compared with the previous year due to the company having increased its workforce and the fact that the CEO is now employed by the company.

## Ziccum in brief

Ziccum's patented technology LaminarPace air-dries liquid vaccine into a thermostable powder vaccine. Before the vaccine is administered, the vaccine powder is mixed with liquid and can then be injected in exactly the same way as a liquid solution vaccine. The LaminarPace technology is gentle, air drying takes place at room temperature, resulting in powder vaccines becoming thermostable. This means that the vaccine can be transported and stored at room temperature, unlike today's vaccines that require costly, complex logistics with an unbroken freezer or cold chain.

## Vision

Ziccum's vision is to increase vaccination coverage worldwide. This can be made possible by minimizing dependence on expensive, impractical, and energy-intensive refrigerated and frozen transport systems and storage.

## Business model

Ziccum's business model is to offer licenses and tech transfers to vaccine companies based on Ziccum's patent portfolio. A strategically important milestone is the establishment of a Fill and Finish production facility containing LaminarPace technology.

## History

LaminarPace was developed by Inhalation Sciences Sweden AB (publ) to generate small amounts of micronized material for aerosolization. However, the many additional high-potential areas the technology could be applied to soon became apparent, and for that reason, Inhalation Sciences carried out a spin-out of LaminarPace into a subsidiary, Ziccum AB, which since mid-2017 has been developing and commercializing the technology on its own. Ziccum's shares were listed on Spotlight Stock Markets on October 25, 2018. On December 1 2020, Ziccum moved to Nasdaq First North Growth Market.

## Market

Ziccum focuses on applying LaminarPace technology to already approved vaccines, or to vaccines that are under development. The vaccine market has seen very strong growth recently, driven by COVID-19. But even apart from COVID-19, the WHO predicts growth for almost all vaccines. In 2019, the global vaccine market was worth 33 BUSD, divided into 5.5 billion doses, excluding military and travel vaccines (WHO Global vaccine market report 2020). Global vaccine production for 2021 is forecast at about 20 billion doses. Future growth largely depends on how COVID-19 develops in terms of booster jabs and mutations.

## LaminarPace technology

Ziccum has developed a method for the gentle air drying of biological drugs. The company's patented technology, LaminarPace, dries at room temperature, which provides a unique opportunity to develop stable, dry formulations of primarily sensitive biological substances.

The basic principle of LaminarPace's function is countercurrent spray drying with separate flows. The constituent liquid is nebulized, i.e. distributed in the inner column in a mist of very small droplets. The size of these can be controlled by a special net.

During the downward flow, the liquid droplets are vaporized, and the moisture is transported through a paper-based membrane which allows evaporation. The external upward flow of very dry air collects the evaporation which is then transported to the absorption column where the air is dried again.

The dry, micronized substance is retained inside the column and collected on a filter in the filter container. The drying cycle is a so-called semi-continuous process. The system not only retains all the properties of sensitive substances, but also allows great possibilities to control certain properties of the particles, e.g. particle size.

The powder produced during the process is normally very easy to dissolve, which enables flexible application possibilities, e.g. vials of intravenously administered drugs, inhalable drugs and even for topical application of single particles through the skin.

## Shares

As of January 1 2021, the total number of shares was 9 606 200 and as of June 30 2021, the total number of shares was 9 806 200. The increase of 200 000 shares is due to the termination of the LTI 2018/2021 option program where all warrants were exercised.

All shares have a voting ratio of 1.

Name	Number of shares	Share capital	Votes
Göran Conradson	760,738	7.8%	7.8%
Försäkrings AB, Avanza Pension	709,658	7.2%	7.2%
Nordnet Pensionsförsäkring AB	347,426	3.5%	3.5%

Övriga aktieägare	7,618,378	77.7%	77.7%
<b>Total</b>	<b>9,806,200</b>	<b>100%</b>	<b>100%</b>

## Share price

Ziccum AB was registered as a public company by the Swedish Companies Registration Office 2018-05-31.

Ziccum's shares were listed on Spotlight Stock Markets on October 25, 2018.

The share's closing price on the first trading day amounted to SEK 5.90.

Ziccum moved to Nasdaq First North Growth Market on December 1, 2020.

The share closing price on June 30 2021 amounted to SEK 18.70.

## Share related incentive programs

At the Annual General Meeting on April 27 2021, it was decided to introduce a long-term incentive program by issuing warrants to the Board (LTI 2021/2024), as well as a long-term incentive program for the company's employees consisting of employee stock options (LTI 2021: 1). No of the options entail the right to a dividend.

Based on the existing number of shares in the company, the dilution as a result of the incentive programs, assuming that all warrants are exercised for new subscription of shares, is approximately 1.4% of the number of shares and votes.

The exercise price per share for LTI 2021/2024 amounts to SEK 28.8 and subscription can take place during the period from 1 May 2024 to 31 May 2024.

LTI 2021:1 runs for three years and means that participants are granted employee stock options free of charge that give the right to acquire shares in Ziccum at a subscription price corresponding to the share's quota value. LTI 2021:1 also gives participants the opportunity to choose to be partially granted synthetic options that give the right to cash compensation instead of shares.

## Transactions with related parties

During the reporting period, fees charged by related parties were invoiced as follows:

The Chairman of the Board, Fredrik Sjövall, has through Axelero AB invoiced fees amounting to 38 kSEK for project management.

Board fees have been paid in accordance with resolutions at the Annual General Meeting.

There have otherwise been no significant transactions with related parties.

## Significant risk and uncertainties in brief

Ziccum's significant risk and uncertainty factors include business-related risks as well as risks related to market and technology development, patents, competitors and future financing.

The company's value is largely dependent on the success of the company's development projects and the ability to enter into partnerships, and that LaminarPace receives broad market acceptance. Ziccum is in the commercialization phase and there is a risk that the company will not reach sufficient profitability.

The company has not generated sufficient income to achieve a positive cash flow, which means that the company needs access to capital before its cash flow becomes positive.

It is the company's assessment that the company has the required financing by the end of Q2 2022.

In light of the outbreak of the coronavirus and COVID-19, Ziccum is closely monitoring the development of events and taking measures to minimize or eliminate the impact on the company's operations. Ziccum follows guidelines from the Swedish Public Health Agency, WHO and ECDC (European Center for Disease Prevention and Control). Ziccum has been able to continue its internal operations without significant impact on COVID-19. However, there is a risk of delays in the Company's external collaborative projects due to the pandemic.

## Note 1 Accounting standards

Ziccum AB (publ) reports in accordance with the Swedish Annual Accounts Act and the Swedish Accounting Standards Board's general advice BFNAR 2012:1 (K3).

The company's accounting principles are described in the company's annual report for 2020.

Amounts are expressed in kSEK, which in this report refers to thousands of Swedish kronor.

Amounts in parentheses refer to comparative figures from the previous year, if nothing else is stated.

## Note 2 Changes in equity

Date	Transaction	Number of serie B	Share capital	Quota-värde	Subscription-course	Total invested capital (SEK)
5 Apr 17	Formation	500	50,000	1.00	1.00	50,000
29 May 17	Share issue	500	50,000	1.00	1.00	50,000
31 Dec 17	Conditional shareholder contribution*	-	-	-	-	1,996,622
25 Apr 18	Bond issue	-	400,000	1.00	-	-
27 Apr 18	Split	2,999,000	-	0.17	-	-
19 Oct 18	Share issue	3,000,000	500,000	0.17	5.26	15,776,962
14 Jan 20	Share issue	1,389,385	231,564	0.17	10.00	13,893,850
6 Jul 20	Share issue	2,216,815	369,469	0.17	17.50	38,794,263
15 Jun 21	Share issue warrants	200,000	3,334	0.17	11.00	2,200,000
<b>Total</b>		<b>9,806,200</b>	<b>1,604,367</b>			<b>70,561,697</b>
